DETAILED ACTION

*** This office action is in response to Applicant's amendment filed January 08, 2008. Claims 1-17 were canceled. Claims 18-29 are currently pending.

*** The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Double Patenting Rejection

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

2. Claims 18-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,372,534 and claims 1-10 of U.S. Patent No. 6,376,270.

Although the conflicting claims are not identical, they are not patentably distinct from each other because they are drawn to the same subject matter for forming a thin film transistor array, whereby the present base claims 18,22 and 26 of this application are broad enough to encompass the scope of claims 1, 5 and 9 of the Patent No. 6,372,534, respectively, and claims 1-10 of Patent no. 6,376,270, and wherein claims 18-29 are respectively anticipated by claims 1-12 of the Patent No. 6,372,534. Employing a photo-imageable polyimide insulating film or an photo-imaged insulating film having low dielectric constant for reducing crosstalk in forming a liquid crystal display device would have been obvious to ordinary skill in the art, wherein alternatively using a photosensitive polyimide layer or a non-photosensitive polyimide layer is well known in the art.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Response to Amendment

3. Applicant's amendment and remarks filed January 08, 2008 have been fully considered but they are not persuasive and in moot in view of the new ground(s) of rejection.

The obviousness-type double patenting rejection is maintained, since the terminal disclaimers filed on July 10, 2007 was not accepted, since the terminal disclaimer signed by the Attorney not of record and no registration number of the Attorney provided therein.

An attorney or agent, not of record, is not authorized to sign a terminal disclaimer in the capacity as an attorney or agent acting in a representative capacity as provided by 37 CFR 1.34 (a). See 37 CFR 1.321(b) and/or (c).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
